---

Well-rounded, adaptable, and outgoing computer science student skilled in leading and motivating others. Seeking to combine concepts learned in class with real world experience from both a fin-tech startup and a big four consulting company to bridge the gap between technology and business.

## Education

**Bachelor of Computing (Honours) | Queen's University, Kingston**

**Class of 2020**

- ▶ Certificate in Business from Smith School of Business
- ▶ Cumulative GPA: 3.9

## Experience

**Project Manager | QMIND, Kingston**

**Sep 2018 - Current**

QMIND is Queen's Machine Intelligence and Neural Design team, that tackles real world problems through the use of AI.

- ▶ Created on-boarding presentations to train new members on general development and machine learning concepts.
- ▶ Led a small team of data and AI scientists in partnership with a local retail store provided recommendations on how to improve their operations using the store's sales data.
- ▶ Presented findings at Canada's largest undergraduate AI conference, CUCAI

**Cyber Risk Analyst | Deloitte, Toronto**

**May - Aug, 2019**

- ▶ Worked closely with the client, a major bank, to develop an Identity and Access Management security solution.
- ▶ Gathered requirements through discussions with the client, crafted the project into a multi-component timeline.
- ▶ Leveraged my adaptability, attention to detail, and ability to thrive under pressure to overcome the problem of slow movement of bank resources, to ensure that project development timelines were met
- ▶ The project successfully integrated with existing software to automatically onboard new employees with the correct level of access, minimizing the risk of any employee having inappropriate access and allowing the client to easily pass certifications.

**Quality Assurance Intern | BioConnect, Toronto**

**Apr - Aug, 2018**

- ▶ Responsible for testing all software and hardware that was delivered to the customer's hands.
- ▶ Implemented automated software tests to free up company resources and save more than \$3000 per regression cycle.
- ▶ Collaborated with multiple departments to find root causes of issues to ensure that all products were of the highest quality.
- ▶ Received the intern of the year award for having the most impact on the company.

**Engineering Intern | BioConnect, Toronto**

**May - Aug, 2017**

- ▶ Developed knowledge of the product line by testing customer-returned products so they could be resold.
- ▶ Identified inefficiencies in testing procedures and developed processes to further increase customer satisfaction.
- ▶ Researched potential customers to identify leads for the sales team and analyzed industry trends to create a report for company strategy.

## Independent Projects (Can be viewed at [johndavidanthony.ca](http://johndavidanthony.ca))

### Self Driving Car

- ▶ A simulation that trains a car with no prior knowledge of driving how to drive without hitting the sides of the track.
- ▶ Using 5 distance sensors as input the car uses a neural network to decide what action to take. It learned how to drive through a genetic algorithm in a process similar to evolution. Through multiple generations it was able to complete a lap and find the most efficient route.

### Smart Mirror

- ▶ Web based smart mirror that fetches and displays your calendar, news articles, the weather and time.
- ▶ Constructed with a two way mirror film so that you can see your reflection and all the information.

### iOS Apps

- ▶ Live currency converter app that can convert any currency in the world at current prices.
- ▶ Calculator app that has all the basic features of any handled calculator.

## Development / Interests

### Development

- ▶ Proficient in Java and Python, with working knowledge of C, C#, Swift, Web Languages, SQL, Haskell & Prolog.

### Interests

- ▶ Artificial Intelligence, IoT, Cyber Security, Project Management, Leadership, Business
